Easy Clip Modules in Kitchen Control Units

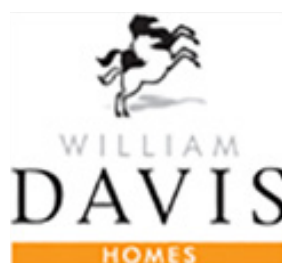

William Davis, one of the largest privately owned construction and development companies of high quality properties have recently started using RPP Easy Clip modules in kitchen control units.

The versatility of the Easy Clip range enabled the installer to choose the range of modules to suit the appropriate kitchen utilities having them individually printed for dish washer, fridge freezer washing machine etc.

"I like the flexibility that the modules offer, the ease of installation and the finished aesthetic" said Ian Beech, Electrical Supervisor, "and our electricians find the

units quicker to install than fitting many traditional fused spur units".

As well as power module combinations the comprehensive Easy Clip range include media and data products such as the new USB charger module suitable for charging iPads, mobile phones and tablets.

“ I like the flexibility that the modules offer, the ease of installation and the finished aesthetic
